Cincinnati, OH 45242

Dear Council Leadership:

Thank you for your interest in the environmental study underway at the Feed Materials Production Center (FMPC).

With regard to your question on anhydrous ammonia use, I can tell you that the FMPC does not use anhydrous ammonia anymore. The last remnants of this chemical were removed from the site very recently, on April 19, 1989.

Thank you for participating in the winter community meeting. We hope to see you at the spring community meeting, to be held on May 15 in the Ross Middle School.

Sincerely,

  
James A. Reafsnyder  
Site Manager
